Release Date: 10/29/2008

In Fight for Open House Seat in KY2, Guthrie May Hold The Line for GOP: In an election for the open US House seat in Kentucky's 2nd Congressional District, Republican Brett Guthrie may have the votes to defeat Democrat David Boswell, according to a SurveyUSA poll conducted for Roll Call, the newspaper of Capitol Hill, and WHAS-TV in Louisville. Guthrie gets 53% today, Boswell 43%. 31% of Democrats cross-over and vote Republican in the House race. Boswell and Guthrie tie among seniors, but SurveyUSA polling has Guthrie ahead in all other age groups. McCain carries the district by 27 points. Republican Guthrie runs 9 points weaker than McCain. Democrat Boswell runs 8 points stronger than Barack Obama. In the district, McCain has Plus 25 Favorability; Obama has Minus 22 Favorability; Guthrie has Plus 14 Favorability; Boswell has Plus 4 Favorability. Republican Ron Lewis, the 7-term incumbent who is not seeking re-election, has Plus 40 Favorability. 800 adults were interviewed by SurveyUSA. Of them, 673 were registered to vote. Of them 587 were determined by SurveyUSA to be likely to vote on or before election day.

1 If the election for President were today, would you vote for ... (choices rotated) Republican John McCain? Democrat Barack Obama? Or one of the other candidates?

Statement of Methodology: The following statement conforms to the principles of disclosure of the National Council on Public Polls: How this poll was conducted: This SurveyUSA poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. Within the report, you will find: the geography that was surveyed; the date(s) interviews were conducted and the news organization(s) that paid for the research. The number of respondents who answered each question and the margin of sampling error for each question are provided. Where necessary, responses were weighted according to age, gender, ethnic origin, geographical area and number of adults and number of voice telephone lines in the household, so that the sample would reflect the actual demographic proportions in the population, using most recent U.S. Census estimates. In theory, with the stated sample size, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than theoretical calculations of sampling error. These include refusals to be interviewed, question wording and question order, weighting by demographic control data and the manner in which respondents are filtered (such as, determining who is a likely voter). It is difficult to quantify the errors that may result from these factors. Fieldwork for this survey was done by SurveyUSA of Verona, NJ.
